Product introduction

Working principle

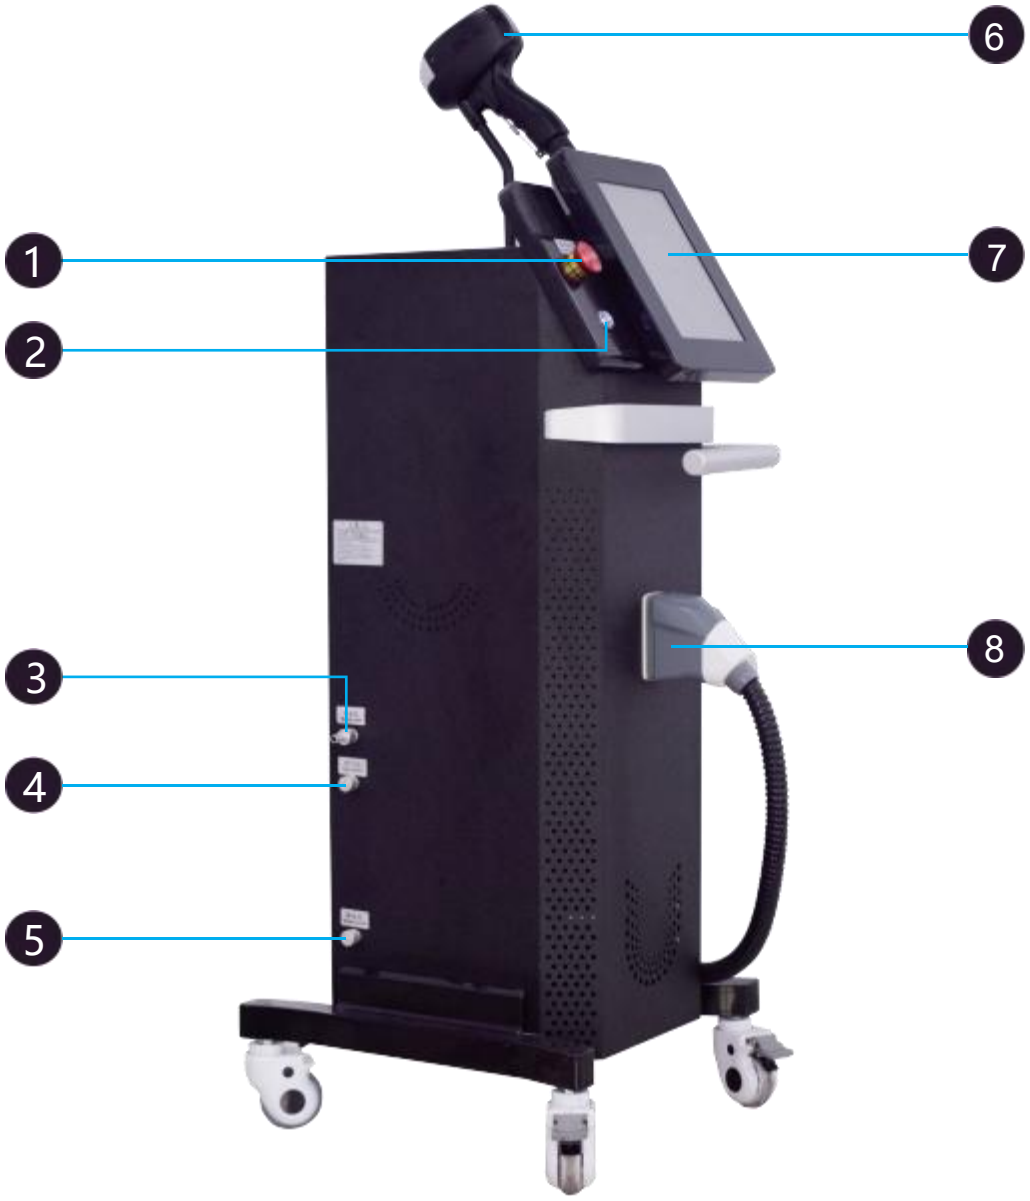

808 freezing point hair removal technology originated in Germany, based on the principle of selective photothermodynamics, through reasonable adjustment of wavelength, energy and pulse width, so that light can pass through the skin surface to the hair root follicle, so that the hair follicle tissue is damaged and slow growth or no growth. The rapid freezing point hair removal system adopts a unique freezing technology, which can cool the local skin to 5 degrees Celsius, overcoming the shortcomings of early hair removal cold touch lighting side effects, skin damage, and complex operation.

Product specifications

808 hair removal device	
Facula	12*12MM
Screen size	10.4
Handle number	50000000
Wave length	808nm
Frequency	1-10Hz
Voltage	200-240V
POWER	2000W
Water tank	5L
Language	Support for various languages
Heat dissipation	Air-cooled + water-cooled + semiconductor
protective system	Temperature , voltage and water shortage protection

Product introduction

Structure introduction

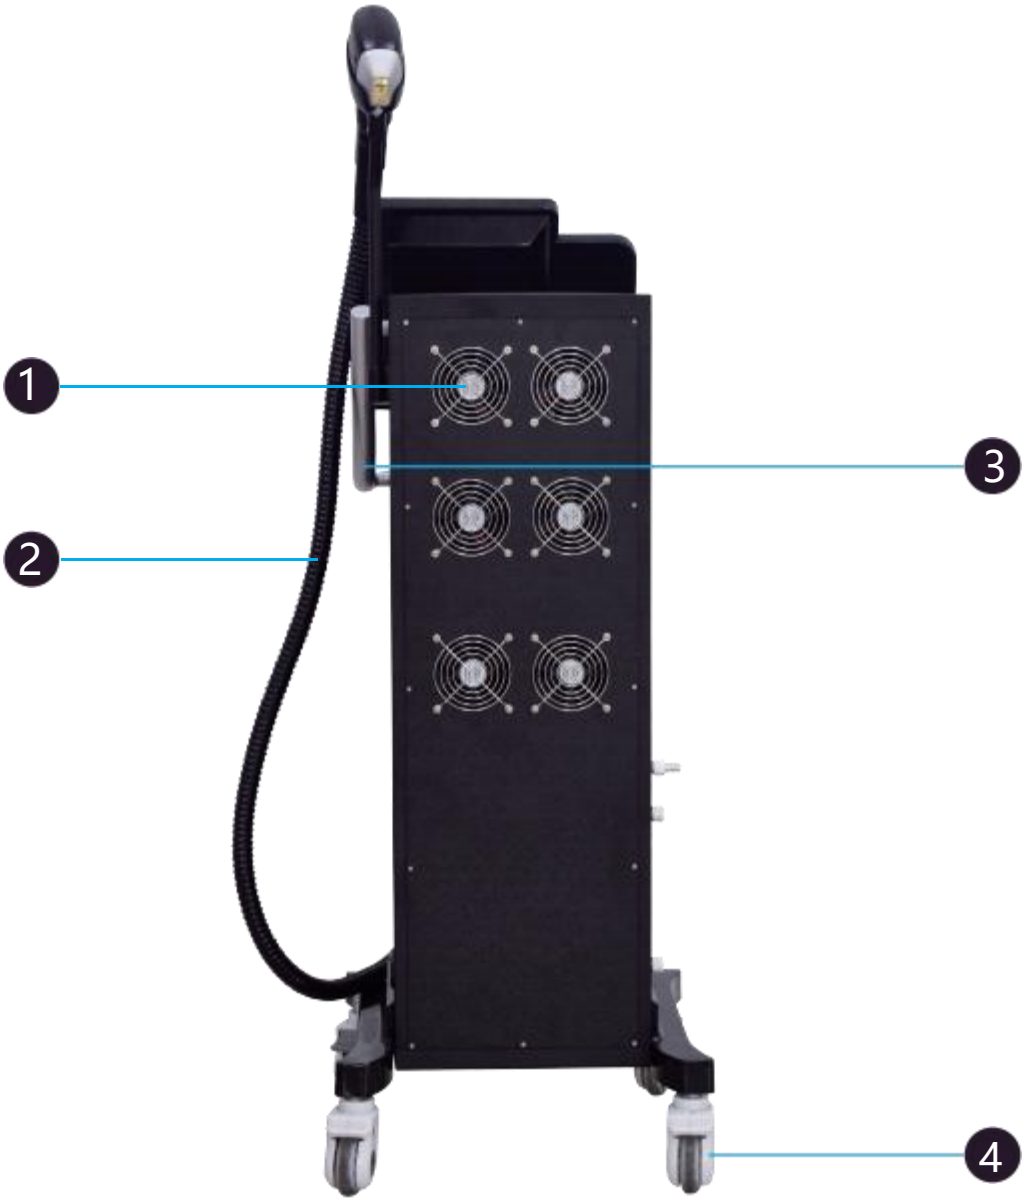

The front of machine
(Product in kind prevails)

1 Emergency stop button
2 Key switch
3 Power switch
4 Gas outlet
5 Water outlet
6 Hand shank
7 Screen
8 Socket

Product introduction

Structure introduction

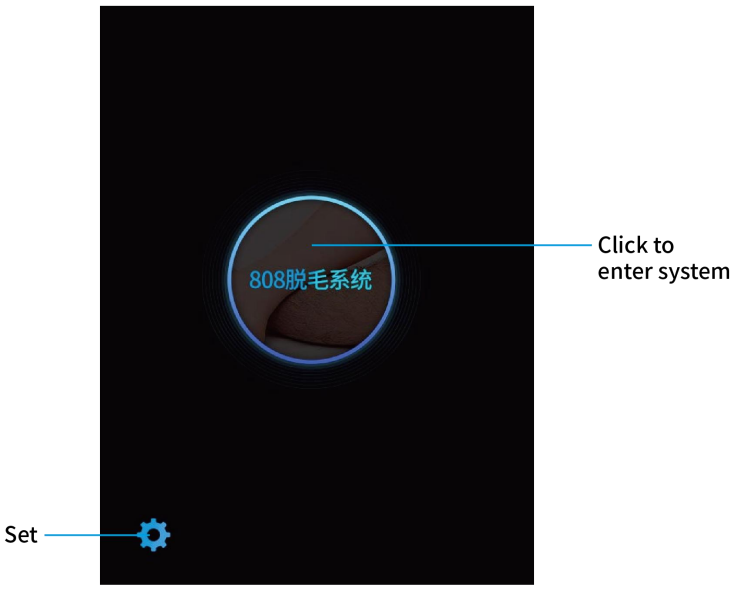

The back of machine
(Product in kind prevails)

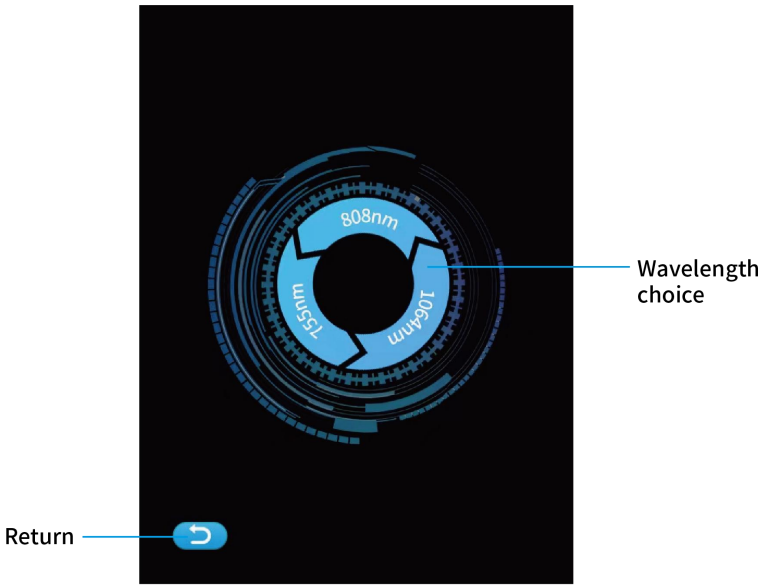

1 Ventilation
2 Energy conduit
3 Handrail
4 Wheel

Product introduction

Interface instructions

(1-1)

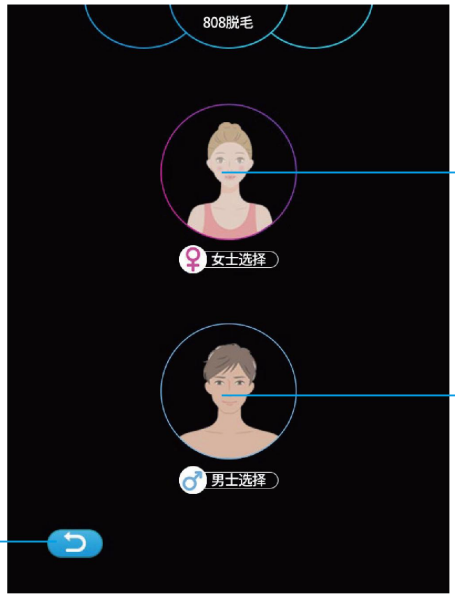

(1-2)

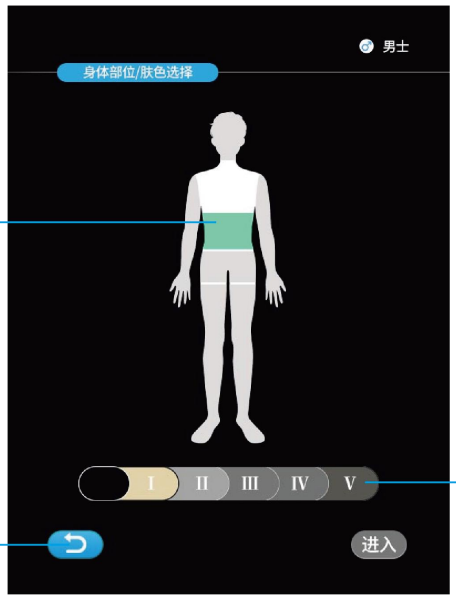

Turn on the instrument, enter (1-1) Click to enter the system (1-2) and select the wavelength you want to treat

Product introduction

Interface instructions

(1-3)

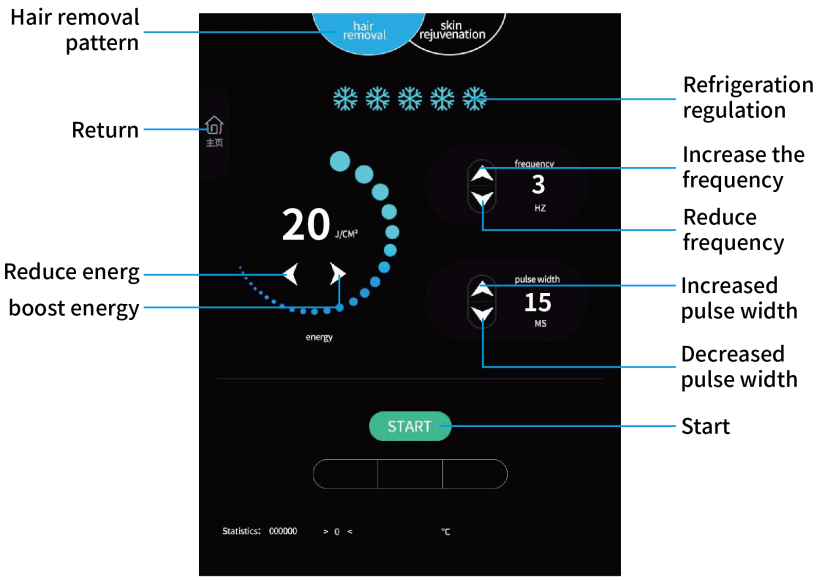

(1-4)

Select gender patterns (1-3); Select Skin tone (1-4)

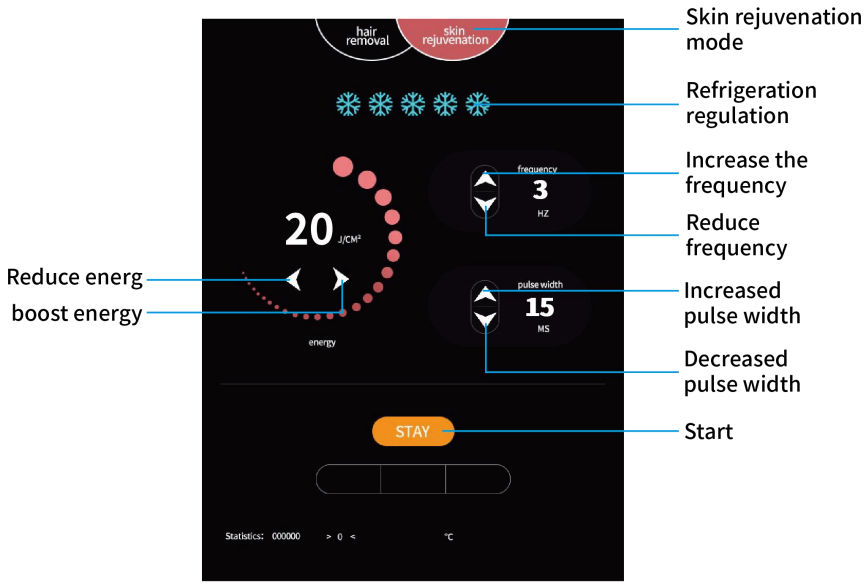

Product introduction

Interface instructions

(1-5)

Select the hair removal mode, adjust the cooling energy, adjust the energy, 20 up adjustment; Adjust the frequency, 3 up; Adjust the pulse width, adjust 15, click the ready button to operate the treatment

(1-6)

Select skin rejuvenation mode, adjust cooling energy, adjust energy, 20 up adjustment; Adjust the frequency, 3 up; Adjust the pulse width, adjust 15, click the ready button to operate the treatment

Instructions for use

Parameter setting

Gender	Pulse width	Frequency	Energy	Time
Man	10-15	3-6	15begin	10-15minute
Woman	10-15	3-6	15begin	10-15minute

Precautions

1. Wear a protective eye mask before treatment.

2, after hair removal, ice can be applied in the freezing state of the gun body (standby mode), or ice pack cold

Apply hair removal area to reduce edema and discomfort.

3. Pay attention to the prevention of trauma within a week after hair removal: do not bathe in hot water, exercise, massage, etc.

4, pay attention to physical sun protection, one month after hair removal to avoid direct sunlight.

5. Slight erythema and edema appear within 24 hours after surgery, which can be relieved by ice.

6. Symptoms such as allergy, itching, and mild burning appear in the treatment area within 48 hours after surgery.

(Moisturizing products with plant essence can be applied to the skin without water.)

7, postoperative blisters, pigmentation, etc. (can be relieved by oral vitamin C)

Instructions for use

Configuration list

Part Name	Amount
Host machine	1
Hand shank	1
Pedal	1
Protective spectacles	1
Funnel	1
Gel	1
Power cord	1

Warning

1, pregnant women, high blood pressure, heart disease, diabetes;

2, people who are allergic to light are prohibited;

3. People with open wounds;

4. Prohibited during menstruation
