Product introduction

Working principle

Through ultra-pulse time of milliseconds and microseconds, the laser can instantly penetrate the epidermis of the skin and reach the deep layers of the skin, instantly crushing the pigment particles inside the skin. and the crushed pigment particles will be swallowed and slowly carried awayby human macrophages. Because the laser of a specific wavelength can reach the diseased pigment tissue through the epidermis and dermis, and only plays a role on the pigment particles, so the epidermis of the skin has extremely few or no damage, there is no scar on the skin. Different wavelengths of laser can be selectively absorbed by blac+k, blue, green, brown, red, brown, yellow and other pigments in the skin, which is known as the "light explosion effect".

Products pecifications

Eyebrow washer parameters	
Laser power supply	220V/110V
Wavelength	1064nm/785nm/532nm
Energy	300-3000J/M（adjustable）
Laser output frequency	1-10HZ
Language	Six languages（Customizable）

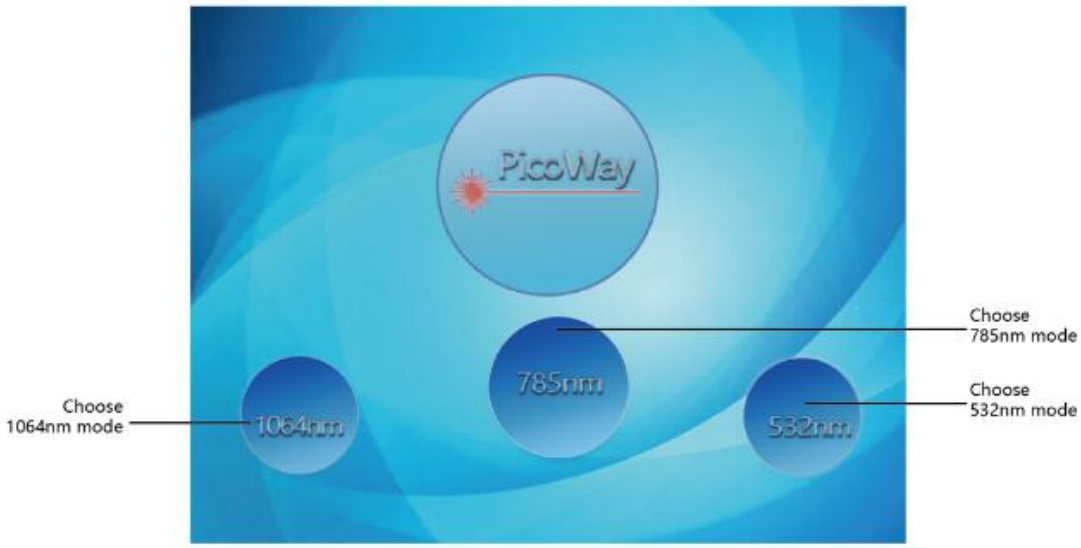
1 Ultra HD Screen
2 Laser Handle Interface
3 Power switch
4 Power cord socket
5 Footswitch socket

Instructions for use

Interface instructions



(1-1)

Turn on the instrument and select the wavelength corresponding to thetreatment

(1-2)

Enter the (1-2) interface,the energy is adjusted from 1.3, the frequency is adjusted from 1,and the energy is adjusted according to the actual feeling of the customer. Click ready to proceed.

Instructions for use

Parameter setting

Laser head	Scope statement
1064nm	Suitable for removing colors such as black and blue, pigmentation and freckles
532nm	Suitable for removing red, brown, green and other colors, effectively desalting all kinds of shallows pots
black face doll	Mainly used for facial whitening and shrinking pores,oil control and other work
No scar1064nm	Non-invasive treatment, will not cause skin damage
No scar 532nm	Non-invasive treatment, will not cause skin damage

Warning

1,pregnant women, high blood pressure, heart disease,diabetes.
2.Women who are menstruating.
3.Patients with skin inflammatory lesions at the surgical site.
4,plastic surgery purpose is not clear people.
5.Skin areas have open wounds.
6.People who can't avoid bright light in the near future.

Instructions for use
