Product introduction

Working principle

Photothermal Conversion:
Specific wavelengths can penetrate the surface layer of the skin and be absorbed by the melanin in the hair follicles. After absorbing laser energy, melanin converts it into heat.

Accurate Temperature Control:
The unique feature of ice point hair removal technology lies in its combination with a cooling system. The part of the treatment head that contacts the skin releases a cooling effect, maintaining the skin temperature at a lower level to protect the epidermis from damage, reduce pain, and ensure more precise and effective heating of the hair follicles.

Hair Follicle Destruction:
The heated hair follicles and surrounding stem cells lose their activity due to the high temperature, but no damage is caused to the surrounding normal skin tissues. This is the key to achieving long-term reduction in hair growth.

Product Parameter

Handle Parameters	
Screen Size	15.6 inch
Spot size	12*18
Wavelength	810nm
Frequency	1-10Hz
Energy	0-50J/cm^2
Voltage	220V/240V
Heat Dissipation	Air cooling + water cooling +TEC cooling
Package Size	56.5*42.5101.5CM
Language	Various languages can be customized
Water tank	7L
GW	52.6KG

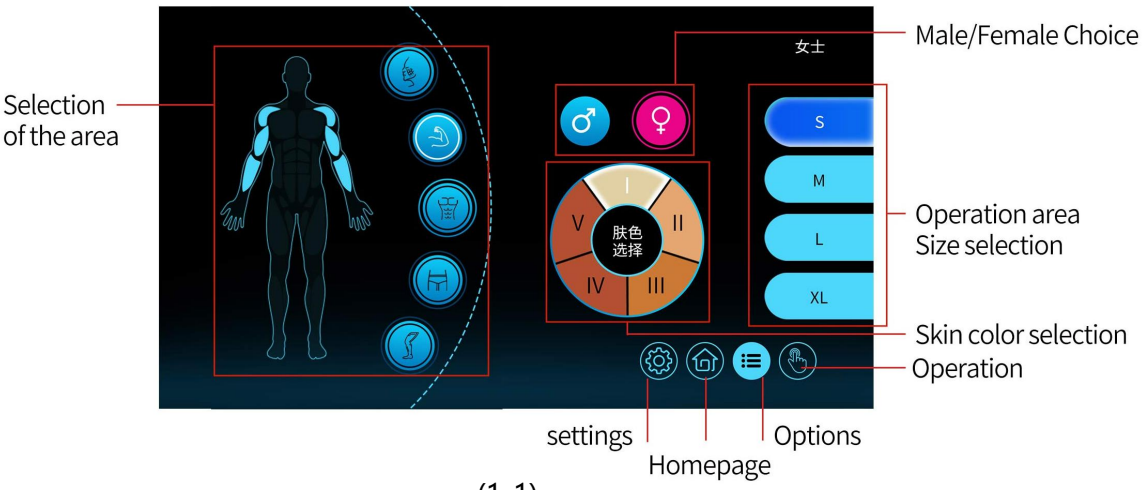
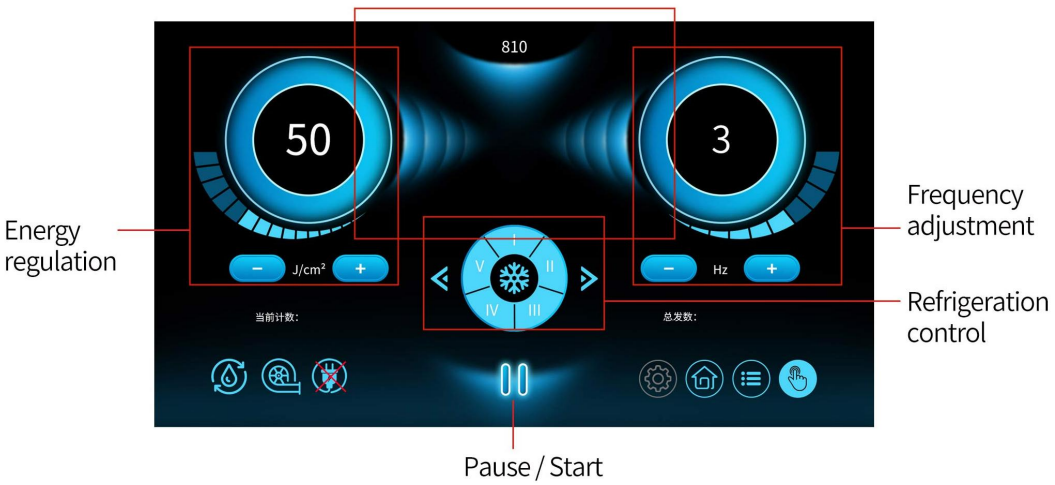
Instruction for Use

Interface Introduction



(1-1)



(1-2)

I. Turn on the device and enter interface (1-1). First select the gender, then choose the treatment area, skin tone, and size of the treatment area. Tap the operation key to proceed to interface (1-2).

II. On interface (1-2), it is recommended to start energy adjustment from 50, with frequency set between 3–5. For cooling, it is advised to set it to the highest level in summer, while two levels are sufficient in winter. Tap Start to begin the operation.

Instruction for Use

Contraindications

1、Pregnant women, high blood pressure, heart disease, diabetes;
2、People allergic to light;
3、People with open wounds;
4、People who cannot avoid sex in the near future;
5、menstrual period.

Precaution

1、Do not wash with soap or shampoo within 6 hours of hair removal. Do not use cosmetics on the day of hair removal, and do not rub the hair removal area hard.
2、Use only mild skin care formulas after hair removal.
3、Please wear loose-fitting clothes to avoid friction against your skin。
4、After hair removal, do not expose yourself to the sun, take a sauna, or swim.
5、Do not use scrubs, alcohol, or antiperspirants after hair removal. It is recommended to use warm water for bathing.
6、Do not eat photosensitive foods (such as celery, spinach, vegetables, lemons, etc.), photosensitive drugs (such as tetracycline, etc.), spicy and irritating foods within a week.

Accessories List

Item	Quantity
810 Handpiece	1 pc
Power Cord	1 pc
Protective Eyewear	2 pairs
Funnel	1 pc
Gel	1 tube

Attention:
The machine is a photoelectric product,During operation, Be careful not to aim at people's eyes, after operation, you need to put the handle into the protective case, revent injury to people by misoperation.
